PROFILE

I am an aspiring full-stack developer with a strong interest in backend development and building scalable web applications. I am currently learning and practicing technologies like Java, Spring Boot, React, and REST APIs. I enjoy understanding how systems work end-to-end and continuously improving my skills by building small projects and exploring real-world application design.

PROJECTS

Online Shopping Platform [🔗](#)

11/2025 – 01/2026

- Built a full-stack e-commerce platform (Spring Boot, React) with 20+ REST APIs for authentication, product catalog, cart, orders, and payments.
- Implemented JWT-based authentication with Spring Security, request validation with Bean Validation, and Redis caching to improve performance.
- Integrated Stripe payments with webhook-based verification and designed a relational database schema (8+ tables) to manage the end-to-end order lifecycle.

Real-Time Deepfake Detection

2024 – 2025

- Prototype multi-modal platform for real-time deepfake (image/video/audio) detection. Implemented CNN-based vision modules and transformer-based NLP; integrated via FastAPI backend with a React frontend.
- Designed inference pipeline; optimized preprocessing and model I/O using NumPy and OpenCV to reduce latency.
- Exposed REST endpoints and implemented a clean React UI for uploads and result visualization.
- Validated individual modules on benchmark datasets for face-swap detection.

SKILLS

Programming Languages: Java, Javascript, Python | **Databases:** MySQL |

Backend Technologies: Springboot , RestAPIs | **Frontend Technologies:** React, TailwindCSS, HTML5, CSS3 | **Tools and Platforms:** Git & GitHub, Postman, VS Code, IntelliJ IDEA

EDUCATION

B.Tech Computer Science and Engineering(AIML)

Shivaji University

CGPA : 7.26

2021 – 2025

Kolhapur

CERTIFICATES

NLP, ChatGPT and Prompt Engineering: 2023-2024
